How can I get the statements & DTR to print on 8.5x11 paper instead of 11x17?

Q: How can I get the statements & DTR to print on 8.5x11 paper instead of 11x17?

Answer

To change the "default" setting to the letter size paper, send one of the following commands to the printer as a text document. The easiest way to do this is from Athena. Place either single line command or the multi-line command in a text file and save it. Send it to the printer using the command, `lpr` *filename*.

Command #1:

```
%-12345X@PJL DEFAULT PAPER=LETTER
```

Command #2:

```
COPIES=1
ORIENTATION=PORTRAIT
PAPER=LETTER
MPTRAY=FIRST
MANUALFEED=OFF
FORMLINES=60
LPARM:PCL SYMSET=PC8
LPARM:PCL PITCH= 10.00
LPARM:PCL FONTSOURCE=I
LPARM:PCL FONTNUMBER=0
ECONOMODE=OFF
DENSITY=3
RET=MEDIUM
RESOLUTION=600
PAGEPROTECT=AUTO
AUTOCONT=OFF
TIMEOUT=15
```
