Remove previous recipients in Apple Mail

Remove previous recipients in Apple Mail

To remove previous recipients in Apple Mail follow the instructions below:

- 1. In Mail.app, under the **Window** menu, select: Previous Recipients. A list of all previous recipients will come up. Those that are already in your address book will have the little Rolodex icon next to them.
- 2. Select an address that you want to remove, then click Remove From List.

This removes addresses that you do not want to show up when Apple Mail autocompletes.
