

Set the default browser in Mac OS X

Question

How do I change the default browser in Mac OS X?

Answer

1. Launch Safari.
2. Follow the menu path: **Safari > Preferences**, and click the **General** tab.
3. From the drop-down list to the right of the words "Default Web Browser", you should see a list of all web browsers installed on the machine. Select the one you would like to set as the default.
4. Close the Preferences window, and quit Safari.
