Web Publishing - Extend your website

Web Publishing - Extend your website

MIT offers a number of ways that you can enhance your website:

- Add a Google search box to your page
- Theme your MIT Custom Events Calendar page
- Link building numbers and addresses to the online campus map
- Provide a discussion board using MIT's Stellar Course Management System . MIT affiliates can request a Stellar site online
- Collaborate with other MIT groups and organizations using the MIT Wiki Service - any MIT community group, project, or organization can request a wiki space
- Get your own SIPB blog or wiki, or run most web applications - the SIPB scripts server runs CGI scripts out of your Athena locker
- Conduct an online survey
