

How do I complete Multifactor Authentication for LastPass?

Q: How do I complete Multifactor Authentication for LastPass?

Answer

When being prompted from LastPass to authenticate your account, you can elect to send an SMS Passcode to your registered mobile device by clicking the **Send SMS passcodes** link in the Multifactor Authentication window.

The screenshot shows the LastPass Multifactor Authentication interface. At the top left is the LastPass logo with four asterisks. At the top right is the text "Multifactor Authentication". The main area is divided into two columns. The left column contains the text "Please complete multifactor authentication on your phone or mobile device." followed by "Alternatively, enter a passcode in the box below:". Below this is a text input field and a red "Authenticate" button. A link "Send SMS passcodes" is highlighted with a red box. At the bottom left is a checkbox labeled "Trust this computer" and a link "I've lost my device". The right column features a large green circular Duo logo.
