Icons are not displaying in the Files panel in Dreamweaver

Icons are not displaying in the Files panel in Dreamweaver

Why aren't the icons in the Files Panel of Dreamweaver displaying?

Answer:

If you're not seeing the connecting, getting, and putting files icons in the Files Panel, this is probably to due creating an FTP & RDS server connection rather than a Site connection. To confirm this, go to Site>Manage Sites, then select the Site and click Edit. If a "Configure Server" window opens, rather than the "Site Definition" window, this means it's not a Site definition.
