User Macro Header Comments

User Macro Header Comments

- When you create a Confluence user macro for The Knowledge Base, include the following comments as a header.
- Modify the lines following Settings:, as needed, to reflect the specific details for that macro.

```
## Macro Name:
## Purpose:
## $Author$
## $Date$
## Settings:
## Macro has a body
## Convert macro body wiki markup to HTML
## Macro generates HTML markup
##
```

Note: The $Author$ and $Date$ variables will populate with your kerberos name when checking the macro into the Knowledge Base macro library on Athena, using RCS.
