MIT Services

Video Conferencing

Host lectures, presentations, special events, and meetings in advanced distance education and videoconferencing facilities that accommodate between 10 and 100 people.

For more information, see:

[Video Conferencing](#)

Audio and Teleconferencing

Audio and teleconference capability is available for six-party conferencing on all MIT VoIP telephones. For more information, see:

[Audio Conferencing Services at MIT](#)

Web Conferencing

IS&T offers several options for web conferencing. For more information, see [Web Conferencing Services at MIT](#).

[WebEx at MIT](#) creates virtual conference spaces that allow access via phone and the internet.

Access Grid Video Conferencing

The Access Grid is an integrated presentation environment which supports large-scale collaborations from distributed meetings, seminars, lectures, to tutorials and training. It provides high-quality, real-time audio and video over high-speed networks to facilitate group-to-group communications, both formal and informal, and interfaces with grid middleware and visualization environments.

For more information about Access Grid, see:

[Access Grid at MIT](#)

Do-It-Yourself Options

For a low-cost solution to individuals needing to connect with professional quality video-conferencing systems from remote locations, learn more about [Movi](#), a PC-based format that is compatible with larger-scale H.264 formats. Movi is supported and administered through AMPS.

For point-to-point connectivity between individuals, we recommend self-service solutions such as [Skype](#) and [iChat](#).
