How can I turn off justification in my Latex document?

How can I turn off justification in my Latex document?

To turn justification off in your document, type the following at the athena% prompt:

```
attach consult
 cp /mit/consult/lib/tex/macros/nojustify.sty .
```

That will copy the nojustify.sty file which contains necessary definitions to your current directory. To actually make use of it, add the line

```
\usepackage{nojustify}
```

after your \documentclass line.
