TSM 6.x for Mac OS X - First-Time Login

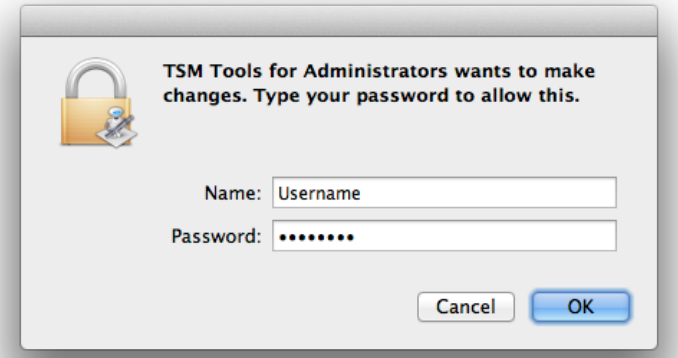

TSM 6.x for Mac OS X - First-Time Login

Steps

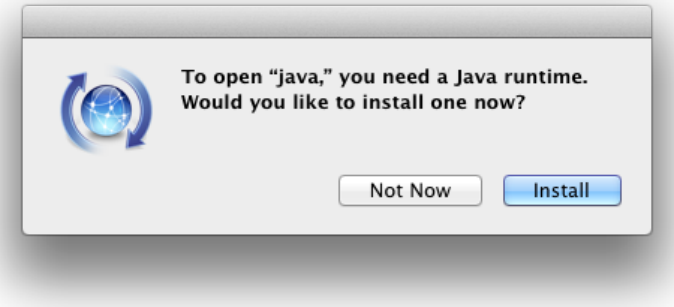

1. In your Applications folder, go to **Tivoli Storage Manager**, and open **TSM Tools for Administrators**.
   Result: The *TSM Tools for Administrators* window opens.

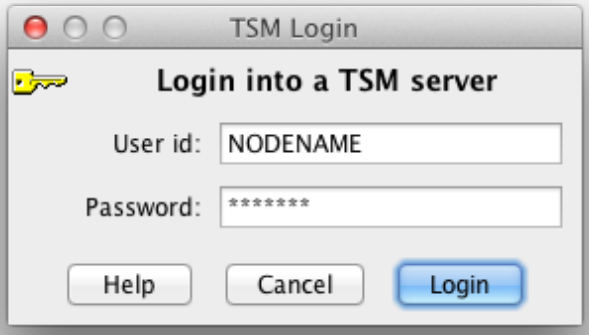

2. Make sure that **Tivoli Storage Manager** is highlighted and then click **OK**.
   Result: The *Authenticate* screen appears.

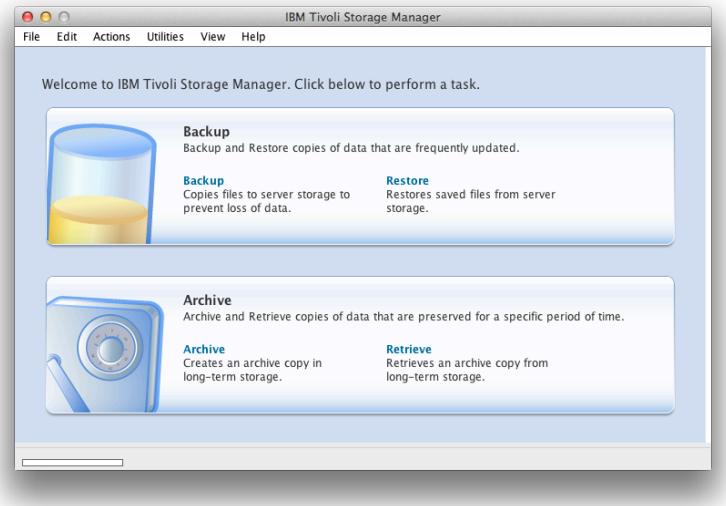

3. Enter your username and OS X Administrator password, and click **OK**.
   - For OS X 10.7 and 10.8 users: If at this point you are prompted to install the Java runtime, please click **Install**. Once Java has been installed, please start back at step 1 of these instructions.

- Otherwise:
  Result: The *TSM Login* screen appears. Please note that it can take up to a couple of minutes for the TSM application to launch the first time.

4. Enter your TSM password and click **Login**. You received this password in email when you registered for your TSM account.
   Note: If you are unable to enter a password successfully, you can reset your password automatically. If you still need help, contact the IS&T Service Desk.
   Result: The main TSM window, IBM Tivoli Storage Manager, appears providing the options: Backup, Restore, Archive and Retrieve. TSM stores an authentication token locally so scheduled backups can authenticate and back up to the TSM server.

5. Quit TSM.

Note: When you do your first-time login, it is important to quit the application so that your password will be stored locally for subsequent use.
