Sophos Central Landing Page

Sophos Central Landing Page

> ⓘ **Starting July of 2021, IS&T has migrated to a new version of Sophos called Sophos Central.** MIT users have until the summer of 2022 before the old version will stop receiving updates. This page references the new version of Sophos. You can see documentation for legacy Sophos here and download the newest version of Sophos here.

On this page:

Overview

IS&T has transitioned to new version of Sophos called Sophos Central. The old version will work until summer of 2022 however you should install the new version of Sophos as soon as possible in order to ensure you continue to receive updates.

Sophos Anti-Virus detects and cleans up viruses, Trojans, worms, and spyware, as well as adware and other potentially unwanted applications. It provides virus definitions and software updates regularly when you are connected to the Internet. The computer does not need to be on the MIT network to receive these updates.

Key Features

- Continuously scans and notifies you of threats.
- Cleans up threats.
- Protects your data by disallowing harmful software to be downloaded.
- Updates regularly, no need to be on campus.

How to Obtain

⊖ If you have other virus protection software installed, IS&T recommends that you remove it. ⊖

To download Sophos, visit the IS&T Sophos page.
