# Why do I get a LaTeX error about that says "doublespace.sty not found"?

## Q: Why do I get a LaTeX error about that says "doublespace.sty not found"?

### Answer

If you try and use the LaTeX package `doublespace`, you might get the following error:

```
! LaTeX Error: File `doublespace.sty' not found.
```

The `doublespace` package is obsolete and has been removed from most distributions. Consider switching to the `setspace` package, which is its replacement and is found in all LaTeX distributions. For more information, see:

How can I change the spacing in my LaTeX document?
