

# JV Upload errors Plausibility Date Check Failed

## Q: JV Upload errors Plausibility Date Check Failed

### Answer

This error occurs when you prevalidate a JV upload. It indicates that SAP can't make sense of the file you've given it.

Look at the file in Word or Excel to determine what might be wrong.

Make sure that the Excel file is saved as **Text (Tab Delimited)** and not as Formatted Text (Space delimited) which is just above it in the Excel Save As... dialog box menu.
