[Overview](#)

[Accessing MITvoip Console](#)

[Using MITvoip Console](#)

## Overview

The MITvoip Console is where you can access many phone features online, including voice mail, call lists, and call forwarding. It also offers new advanced features like sequential or simultaneous ringing, conference calls for up to six parties, and remote office.

The interface may seem somewhat different from other applications you have used. Read the [Introduction to the MITvoip Console Interface] to learn about navigating panes.

The MITvoip Console is a vendor partner application (Sylantro).

## Accessing MITvoip Console

**Note:** Use a browser with your [personal certificates] and [Adobe Flash Player](#) installed.

1. [Login to the MITvoip Web Interface](#).
2. Click the **MITvoip Console** button.  
*Result:* The MITvoip Console will open.
