

# Is there a Windows 10 Rollback Option?

## Q: Is there a Windows 10 Rollback Option?

### Answer

#### To rollback to Windows 10 from Windows 11:

- Open Start Menu, System, Recovery, select Go Back
- Choose a reason for going back, click Next
- On Check for Updates, click No, Thanks
- Click Next
- Click Next
- Select Go back to Windows 10

There are a few caveats to note before you take action.

- The update to Windows 10 must have taken place within 30 days.
- This OS will be "de facto" soon and part of Windows updates.
- You should consider backups with [Code42/CrashPlan](#) both before and after rolling back your machine to the prior OS.
