

# "No appropriate line items found for document number" - JV creation error message

## "No appropriate line items found for document number" - JV creation error message

When I try to create a journal voucher, I get an error:

No appropriate line items found for document number

### Answer

- Check the document number in **Find JVs** that is being used to create the journal voucher.
- This error occurs when the document is about ProCards and Swept Charges. If so, then you need to create a **General JV** and select type of **Move a swept charge**.
