# How can I log Zephyrgrams I receive?

## How can I log Zephyrgrams I receive?

If you would like to leave a log file containing the text of all the zephyrgrams you receive. This log file will be written into the file

```
/tmp/zwgc_log.${USER}
```

(e.g. if your username is "joeuser" then the copies will be saved in "/tmp/zwgc_log.joeuser").

You can find an example of how it is done by typing:

```
attach zephyr
 more /mit/zephyr/attic/examples/log_file
```

If you do create a log into the /tmp directory, you might want to delete it when you log out – otherwise it could be potentially read by other users. To do that automatically, insert the line:

```
/bin/rm /tmp/zwgc_log.${USER}
```

in the ~/.logout file.
