How can I run Simulink on Athena?

How can I run Simulink on Athena?

SIMULINK is a program for simulating dynamic systems from the MathWorks Inc. It is an extension to the Matlab environment that provides the capabilities for graphically creating dynamic systems models and then analyzing those systems.

To run simulink, start matlab as usual, and type

```
>> simulink
```

at the matlab prompt.

To see simulink demos, type:

```
>> demo simulink
```

or use the "demo" button in the simulink window.

Full documentation is available from the Matlab HelpDesk (requires a web browser). Type "helpdesk" at the matlab prompt to start it up, then select "Online manuals" on the main page.
