Changing colors with the default MIT DLC Theme

Changing the Site Color Scheme

1. Click **Appearance**, then **Settings**.
2. Click the name of your theme (MIT DLC) in the upper right corner.
3. Open the *Styles* drop down list and apply a preset color scheme from the menu.

Changing colors with the MIT Adaptive Theme

It is easy to change your site color scheme including the page background color when working with the MIT Adaptive theme. Please note that not all themes allow color changes or do so in the way described here.

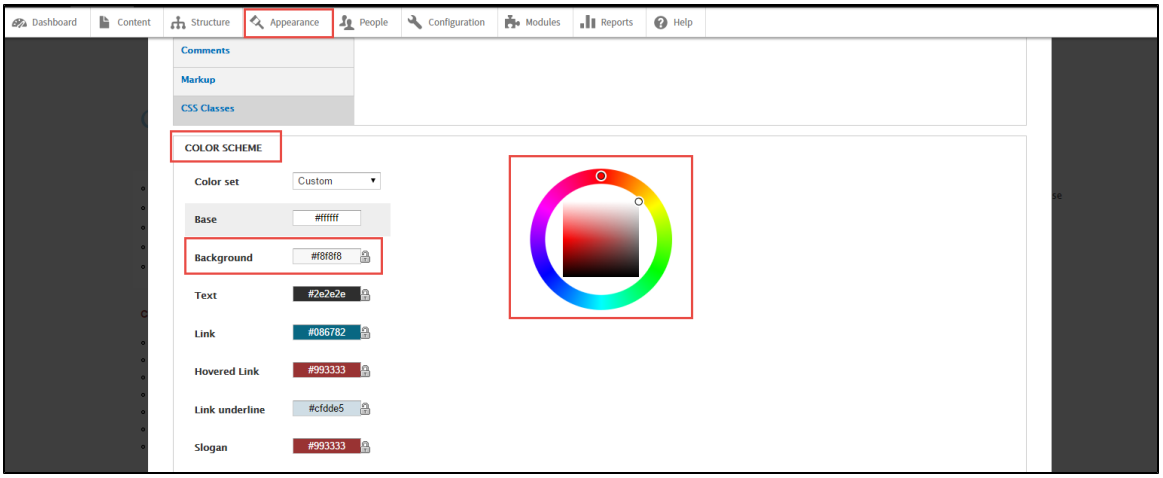

Changing the Site Color Scheme

1. Click **Appearance**, then **Settings**.
2. Click the name of your theme (MIT Adaptive) in the upper right corner.
3. Scroll down to the *Color Scheme* section and apply a preset color scheme from the popup menu.

Changing the Color of an Individual Element

1. Click the text box to the right of the element.
2. Select a color by clicking the outer circle of the color picker.
3. Refine the color by clicking in the inside square.

Note: You can also directly enter a hexadecimal color code.
