

How do I create a page that lists all articles with a certain label?

How do I create a page that lists all articles with a certain label?

Use the confluence macro

```
contentbylabel
```

For example:

```
{contentbylabel:c-coeus|showLabels=false|showSpace=true|sort=title|maxResults=100}
```

Produces the following:

Page: [Adobe Reader could not open xxx.xfd because it is either not a supported file type or because the file has been damaged \(IS&T Contributions\)](#)

Page: [How can I access the Coeus application? \(IS&T Contributions\)](#)

Page: [How can I obtain a Coeus account? \(IS&T Contributions\)](#)

Page: [Kuali Coeus Landing Page \(IS&T Contributions\)](#)
