My PC boots very slowly. How can I speed it up?

Q: My PC boots very slowly. How can I speed it up?

Answer

Some possible remedies for slowly booting PCs:

Lenovo:

- Disable Wake on LAN in BIOS - Hit **Enter** 3 times to get to this setting
- Disable unneeded startup processes using msconfig - some of the worst are
    - Skype
    - Weatherbug
    - HP printer management and update programs
    - Instant Messaging software
    - Miscellaneous software updaters (leave Sophos, Java and Acrobat updates)
- Remove obsolete network drive mappings
- Disable Sophos full drive scan at boot - DO THIS AT YOUR OWN RISK
