# How can I view the members of a mailman list - ?

## How can I view the members of a mailman list - ?

### Question

How do I view a list of all members of a mailman list?

### Answer

### On the web

As long as there are no hidden members, this link will give the complete membership list (replace "listname" with the name of your list):
http://mailman.mit.edu/mailman/roster/listname

The roster link above will ask you for your list password; if you want to sign into the list using your MIT certificate you can use:
https://mailman.mit.edu:444/mailman/roster/listname

The roster can be viewed by list owners, and possibly by others depending on what settings the owner has set on the list.

### On Athena

```
athena% add consult
athena% mmblanche listname > outputfile
```
