

What dorm printers still require Kerberos KLP authentication?

Q: What dorm printers still require Kerberos KLP authentication?

- What dorm printers still require Kerberos KLP authentication?
- Do I need to use KLP to print in my dorm?

Answer

As of Spring semester 2011 there are no longer any dorm printers that require kerberos authentication.

Note that even though the printer does not *require* Kerberos authentication, it will still *accept* it, so if someone's computer is already set up to use KLP, that will continue to work regardless.
