Unsave SecureCRT or SecureFX Password

Unsave SecureCRT or SecureFX Password

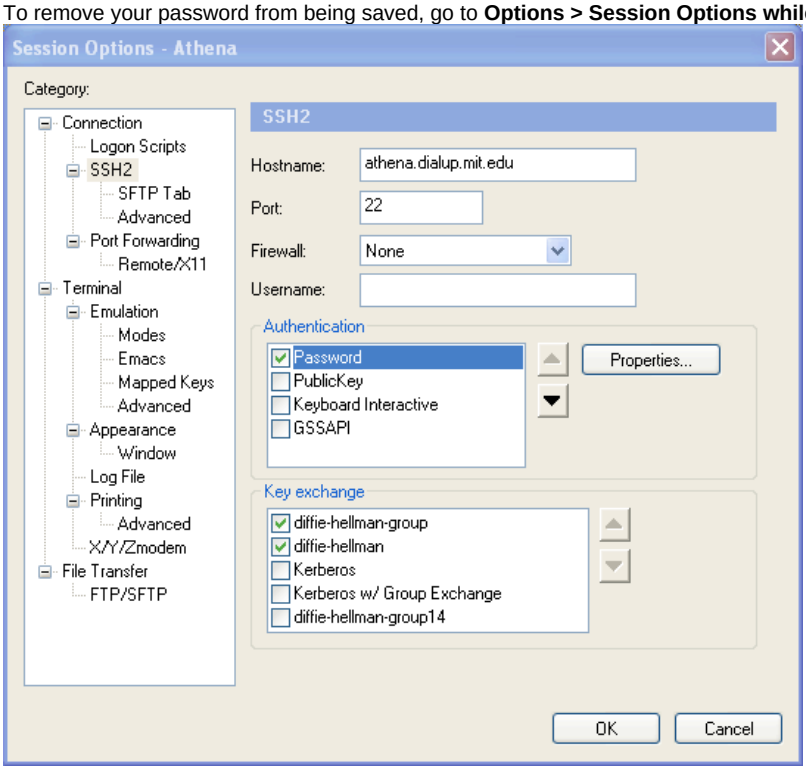

How do I unsave my password in SecureCRT / FX?

Context

Users can choose whether or not to save their password when connecting via SecureCRT or SecureFX.

Answer

1. To remove your password from being saved, go to **Options > Session Options while connected to Athena**.

2. In the Session Options window, select **SSH2**, then select **Password** and click on **Properties**. You'll see two options to unsave the password or to change it.
