

How do I install ArcGIS Pro?

Q: How do I install ArcGIS Pro?

Answer

1. Download the installer from the [MIT software grid](#).
2. Click on the installer file to open it and follow the prompts.
3. The first time you open Pro, click "Configure your licensing options" at the bottom of the screen.
4. Change the license type to "Concurrent Use License" and enter the MIT license server (license-7.mit.edu) in the License Manager box.
5. Click Refresh.
6. Check off the licenses you need: ArcGIS Pro Advanced plus any extensions you use. You can add additional licenses later if you need to.
