Frequently Asked Questions

#### **MIT Services**

#### Video Conferencing

Host lectures, presentations, special events, and meetings in advanced distance education and videoconferencing facilities that accommodate between 10 and 100 people.

For more information, see:

Video Conferencing

#### **Audio and Teleconferencing**

Audio and teleconference capability is available for six-party conferencing on all MIT VoIP telephones. For more information, see:

Audio Conferencing Services at MIT

#### **Web Conferencing**

IS&T offers several options for web conferencing. For more information, see Web Conferencing Services at MIT.

WebEx at MIT creates virtual conference spaces that allow access via phone and the internet.

- Zoom Landing Page
- Webex Landing Page
- Microsoft Teams for Education Landing Page

#### **Access Grid Video Conferencing**

The Access Grid is an integrated presentation environment which supports large-scale collaborations from distributed meetings, seminars, lectures, to tutorials and training. It provides high-quality, real-time audio and video over high-speed networks to facilitate group-to-group communications, both formal and informal, and interfaces with grid middleware and visualization environments.

For more information about Access Grid, see:

Access Grid at MIT

## **Do-It-Yourself Options**

For a low-cost solution to individuals needing to connect with professional quality video-conferencing systems from remote locations, learn more about Movi, a PC-based format that is compatible with larger-scale H.264 formats. Movi is supported and administered through AMPS.

For point-to-point connectivity between individuals, we recommend self-service solutions such as Skype and iChat.
