I've successfully connected to the Data Warehouse in Tableau, but I don't see anything. What do I do?

Q: I've successfully connected to the Data Warehouse in Tableau, but I don't see anything. What do I do?

Answer

1. Click the **Select Schema** dropdown.
2. Type "WAREUSER" (in all caps).
3. Click the **search** icon.
4. Choose **WAREUSER** from the list.
5. Under Table, click the **search** icon to see a list of all the tables you have access to.
6. Double-click the detail table you'd like to report on, and then add any other dimension tables, updating joins as necessary.
