Managing Project Permissions on Tableau Server

Managing Project Permissions on Tableau Server

The default set up when your DLC begins using Tableau Server is as follows:

- Each DLC has a Test project ("DEPT Test") and a production project ("DEPT")
- tableau-DEPT-admin has Project Leader permissions for both projects
- tableau-DEPT has Publisher permissions for both projects
- tableau-DEPT has Interactor permissions for DEPT Test
- all of MIT has Interactor permissions for DEPT

If you'd like IS&T to set your project up differently, please let us know when we set up your project.

For more information on the Tableau roles, see:

- Tableau Server permissions
- Managing Permissions in the Tableau Server help guide
